Re: Change of reporting units of the Rivaroxaban assay - Coagulation

Change of reporting units of the Rivaroxaban assay - Coagulation

Following review of reagent preparation a change in the **reporting units** for Rivaroxaban assay is required. The new units will be implemented from the 22nd September 2015 and is shown below.

	Units
Current units	µg/ml
New units	ng/ml

If you require any further information regarding this reference range please contact the haematology laboratory.
