Re: Change of reference range of Thrombin Times - Coagulation

Change of reference range of Thrombin Times – Coagulation

Following review of reagent preparation a change in the reference range for Thrombin Time is required. The new range will be implemented from the 22nd June 2015 and is shown below.

	Reference range
Current reference range	21 – 28.5 seconds
New reference range	11 – 17 seconds

If you require any further information regarding this reference range please contact the haematology laboratory.
